

Stress Test Report – Insolvency Prevention System

Generated: 2026-02-20 09:06:05

Summary: 20 tests run. Passed: 20, Failed: 0.

#	Test	Pass	Total	OK	Fail	Avg (ms)	P95 (ms)
1	Health check sequential (50)	Yes	50	50	0	529.9	569.3
2	Health check concurrent (20)	Yes	20	20	0	1574.3	2024.7
3	Recent analyses sequential (30)	Yes	30	30	0	523.2	545.9
4	Recent analyses concurrent (15)	Yes	15	15	0	1318.1	1482.6
5	Financial analyze sequential (10)	Yes	10	10	0	518.9	600.2
6	Financial analyze concurrent (5)	Yes	5	5	0	731.1	742.8
7	Financial analyze invalid payload	Yes	1	1	0	496.5	496.5
8	Financial feature importance (20)	Yes	20	20	0	548.7	651.9
9	Employee analyze sequential (10)	Yes	10	10	0	586.0	641.0
10	Employee analyze concurrent (5)	Yes	5	5	0	686.0	697.3
11	Employee analyze invalid payload	Yes	1	1	0	534.8	534.8
12	Employee feature importance (20)	Yes	20	20	0	519.9	624.6
13	Templates company (20)	Yes	20	20	0	598.3	691.9
14	Templates employee (20)	Yes	20	20	0	566.1	655.1
15	Mixed workload concurrent (15)	Yes	15	15	0	1302.7	1457.4
16	Sustained health load (100)	Yes	100	100	0	533.0	568.7
17	Financial analyze throughput (20)	Yes	20	20	0	518.8	550.4
18	Report insolvency (3)	Yes	3	3	0	572.6	591.4
19	Error recovery (invalid then 5 valid)	Yes	5	5	0	533.8	547.8
20	High concurrency health (30)	Yes	30	30	0	2439.0	2873.3

Recommendations

- Monitor P95 latency under production load; consider caching for heavy endpoints.
- Run tests periodically (e.g. in CI) to catch regressions.
